

GDPR: LET'S GET YOU READY

When it comes to data protection, our lawyers are recognised as leading experts. We assist global brands, UK plcs and regional technology and service businesses on all issues of data protection and technology law.

We can help guide and steer you through the entire process to ensure that you are GDPR ready. Here is a snapshot of some of the things that we can offer and with which we would be happy to assist you.

GDPR GAP ANALYSIS

We can conduct a review of your business to identify where the key areas of non-compliance exist. This often includes data mapping, reviewing policies and procedures, examining third party contracts and conducting audit interviews with your staff. We will then report to you on the findings.

IMPLEMENTATION

We can deliver implementation of recommendations from the gap analysis, including drafting new policies, updating consent processes, renegotiating changes to third party contracts and creating security breach processes.

ONGOING MONITORING

Once all implementation work is completed, we can help ensure that you remain GDPR ready and that all the hard work in the run up to May 2018 continues to protect the business.
